Erratum DOI 10.1007/978-3-319-30379-6\_71

The authorship of the present article has been revised so that Michael Yodzis is now listed as the only author, to make clear that Dr. Chris T. Bauch and Dr. Madhur Anand were not contributors to this publication. The present contribution is an extended and revised version of the publication ‘Coupling fishery dynamics, human health and social learning in a model of fish-borne pollution exposure’ by M. Yodzis, C.T. Bauch and M. Anand, *Sustainability Science* 11, pp. 179-192 (2016).

The results are extended to include a more complete explanation of the model’s dependence on its initial conditions, and the sensitivity analysis is enlarged to study the influence of the ecological parameters on the model’s qualitative outcomes. Any mistakes or omissions are the sole responsibility of Michael Yodzis.
