**Analysis of HLA-B\*2705 peptide motif, using T2 cells  
and monoclonal antibody ME1**

*Immunogenetics* 39: 444–446, 1994

The ME1 antibody was generated by Ellis and co-workers.  
(Ellis, S. A., Taylor, C., and McMichael, A. J. Recognition  
of HLA B27 and related antigens by a monoclonal antibody.  
*Hum Immunol* 5: 49, 1982)

J. P. Houchins

**Natural killer cell lectin-like receptors have divergent carboxy-termini,  
distinct from C-type lectins**

*Immunogenetics* 39: 218, 1994

Line 7 of the Figure legend should read “2 residues past  
MBP-A C<sup>217</sup>” instead of “2 residues past MBP-A C<sup>127</sup>”.  
The latter is a typographical error.
