Planta (1996) 199:329–335

In the above article the authors forgot to cite the Genbank accession number and the designer of the primers. This information is provided below.

The cDNA fragment encoding ACC oxidase from the cDNA library was isolated by using the oligonucleotide primers homologous to conserved regions of ACC oxidase cDNAs of sunflower designed by Dr. J.-H. Liu, Department of Biological Sciences, The University of Calgary, Calgary, AB, Canada (Genbank accession no. L21976), tomato (X58885), and petunia (L212976).
