ERRATUM TO: [JHEP06\(2019\)021](#)

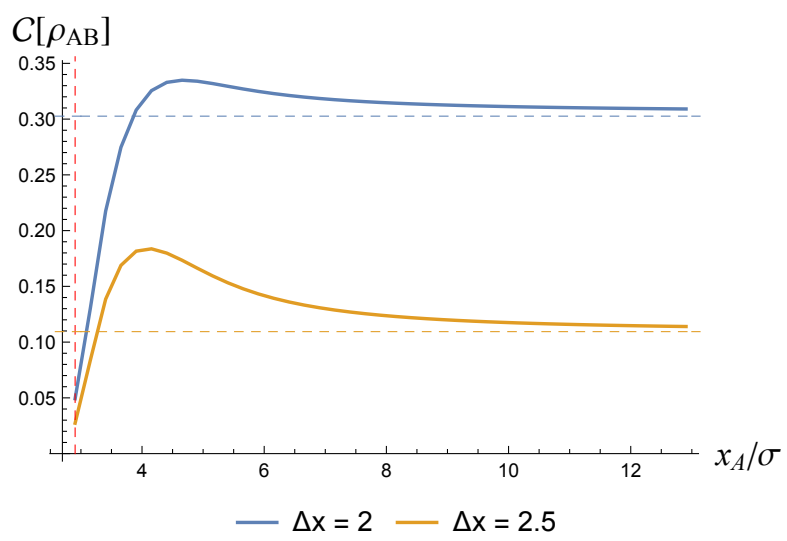

ABSTRACT: We provide a minor correction to the caption of figure 3, as well as a replacement for the left figure of figure 5.

ARXIV EPRINT: [1810.07359](#)

## 1 Corrections to figures and captions

1. The first minor correction concerns the caption of figure 3. The correct sentence should read: “Concurrence as a function of position of detector A for fixed detector separations  $\Delta x = 2\sigma$ , with . . .”
2. The left diagram in figure 5 should be replaced with the new figure 1 below.
3. The last sentence of the 2nd last paragraph on page 9 should read “We see a degradation of entanglement near the mirror at early times that widens into a death zone at late times, which is likely due to the differing magnitudes of the mirror velocity.”

None of the basic conclusions of the paper are affected as a result of these changes.

**Figure 1.** Replacement for the left figure of figure 5.
