### Erratum to: Intensive Care Med DOI 10.1007/s00134-011-2380-4

Due to an error in calculation during manuscript preparation, the rate of pneumothorax was wrongly reported as 8.1%; this incorrect figure was given in the second paragraph of the Results section and in Tables 1 and 3. The correct frequency of pneumothorax was 9.4% (24 out of 255 patients).
