Unfortunately, in the original publication, under Section 3.2, finding the optimum value of c, the first inequality was incorrectly published. The corrected equation is given below:

$$
MSE_c = \rho E \left(c^2 \frac{W^2 h^2(W)}{\rho} - 2c W h(W) \right) + \rho^2
$$
$$
\geq \rho E \left(W h(W) \right) \left(c^2 \frac{E \left(W h(W) \right)}{\rho} - 2c \right) + \rho^2.
$$
