### Erratum to: Arch Toxicol DOI 10.1007/s00204-016-1735-6

Unfortunately, two references in the original article have been cited in the wrong context.

In the section “Risk assessment under consideration of background exposures to NIS inhibitors”, the reference to Braverman et al. (2005) should be replaced by Greer et al. (2002) and the reference to Wolff and Murray (1963) should be replaced by the new reference Weterings et al. (2016).

Weterings PJM, Loftus C, Lewandowski TA (2016) Derivation of the critical effect size/benchmark response for the dose–response analysis of the uptake of radioactive iodine in the human thyroid. *Toxicol Lett.* doi:[10.1016/j.toxlet.2016.06.004](https://doi.org/10.1016/j.toxlet.2016.06.004).

The missing funding information is given below the Acknowledgment section.

**Acknowledgments** This work was funded by the fertilizer industry.
