Retraction Note to: Naunyn-Schmiedeberg's Archives of Pharmacology (2019) 392:1477–1489
<https://doi.org/10.1007/s00210-019-01687-2>

The Editor in Chief retracted this article (1) because of significant concerns regarding a number of Figures presented in this work, which question the integrity of the data. Specifically: Figure 2B contains images that appear to be the same or nearly the same as those published previously in a number of unrelated publications (2, 3, 4 - now retracted).

Figure 3C and 5C contains a number of histopathology images which appear to have been previously published (5 - now retracted).

The authors were unable to provide raw data.

Author Ping Mo agreed to retraction but has not stated if they agree to this retraction notice. The remaining authors did not respond to any correspondence from the editor or publisher about this retraction.
