The author, Alan Cowey, writes the following: In my review entitled “The Blindsight Saga,” I cite the article by De Gelder et al. (2009, Intact navigation skills after bilateral loss of striate cortex, *Current Biology*, 18:R1128–R1129). In discussing the possibility that the patient was navigating by echolocation I cited the authors as saying that the possibility “...can be safely discounted” whereas what they actually wrote was “...cannot be totally ruled out”. The error arose because I was citing a prepublication version of their paper and not the final revised version. I am happy to acknowledge my error and apologize for it.

The online version of the original article can be found under
