Erratum to: Appl Math Optim (2013) 68:255–274 DOI 10.1007/s00245-013-9205-5

The sentence at the top of page 261 contains an error in the expression for b . The text should read, “From here it is readily seen that the radius of convergence of the power series (2.9) is nil when $a < \frac{3}{2}$ and $b \in (\frac{3}{4} - \frac{3}{2}a, 2 - 2a), \dots$ ”. We are grateful to Pavol Quittner for bringing this typo to our attention. A tighter estimate of the zero-radius region and a deeper analysis of the asymptotic properties of solutions is provided in [1].
