Fig. 1 Synthetic test beds and dimensionless bed and width profiles for the synthetic test beds analyzed in this study. All scenarios have the same slope of 0.002. S1 (a, b) has no bed or width undulations, S2 (c, d) has only width undulations, S3 (e, f) has only bed undulations, S4 (g, h) has bed and width undulations that covary in phase, and S5 (i, j) has bed and width undulations that also covary but are out of phase
