Coral Reefs. DOI 10.1007/s00338-005-0009-1

In the printed and online version of the article, Figure 5 should have displayed as follows:

Fig. 5 Seawater temperatures at 15, 30, and 50 m depth on the reef slope at Carmabi Buoy One, Curaçao, over an 18-month-time interval. The 30 m line (*dotted*) largely mirrors the temperature at 15 m (*solid black*), whilst at 50 m (*grey*) the water temperature shows a different pattern and is often markedly cooler
