After the online publication of the above mentioned article, we realized that important information in Fig. 1 got lost during the

production process. Besides the lack of the scale bar in Fig. 1c, labels for landmarks 1–10 are missing in the schematic wing of Fig. 1c. Unfortunately, we did not realize these mistakes during the proof-reading and we apologize for any inconvenience caused by this.

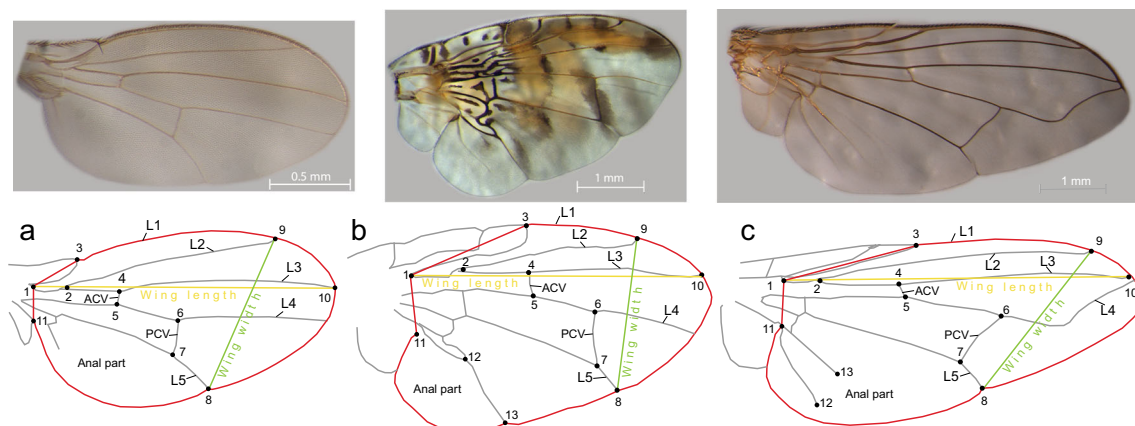

Fig. 1 Wing outlines with landmarks and measurements. Wing length, width and outline for the manually measured area (red line) and landmarks from 1 to 11 in *D. melanogaster* (a) and from 1 to 13 in *C.*

capitata (b) and *M. domestica* (c). The landmark coordinates were used to extract wing length, width and WCS. ACV corresponds to anterior cross vein, PCV posterior cross vein, L2–L5 longitudinal veins
