CrossMark

Editorial: Special Issue on Computing and Combinatorics

Donglei Du[1] · **Dachuan Xu[2]**

This special issue is associated with the 21st Annual International Computing and Combinatorics Conference (COCOON) in Beijing, China, August 4–6, 2015.

Papers for this special issue were originated from participants of COCOON 2015 (21st Annual International Computing and Combinatorics Conference). The 6 papers accepted for this special issue were selected using the rigorous external review process of *Algorithmica*. Included are topics of both theoretical and practical importance, such as algorithmic game theory, graph and network flow theory, approximation algorithms, computational geometry, complexity theory, etc.

We would like to take this opportunity to show our great appreciations to all the people involved in this process in helping us to complete this special issue, including the authors, the reviewers and the journal.
