This part II of our Special Issue ICETI 2014 presents further papers presented at the 3rd International Conference on Engineering and Technology Innovation which was held from October 31–November 04, 2014, at the Howard Resort Hotel, Kenting National Park in southern Taiwan. It covers a wide range of fundamental studies, industrial practices, and engineering innovations by applying the knowledge of microsystem technologies. Also all of these articles underwent a rigorous peer-review by Microsystem Technologies. Acceptance into this Special Issue was based on the reviewers' recommendation, mandatory revisions, and final examination by the Guest Editor.

We would like to express the deepest thanks to the reviewers for taking the time to comment on the papers. Finally, we would also like to thank the editorial team for the work making this special issue possible.

Guest Editor

Prof. Wen-Hsiang Hsieh, January 2017

Editor-in-Chief of Journal Microsystem Technologies,
Prof..Bernd Michel
