

Acknowledgement to reviewers 2012

Published online: 17 March 2013
© Springer-Verlag Berlin Heidelberg 2013

The Editors and publisher gratefully acknowledge the excellent work performed by our reviewers in the year 2012. The quality of *Oral and Maxillofacial Surgery* is definitely depending on the review process. The work laid down by our reviewers is essential for an increasing interest of our journal in Europe and outside.

We thank all the reviewers for their excellent expertise which helps to increase the reputation of the journal. Without their dedicated hard and time-consuming work such achievement would not be possible.

The Editorial Office as well all authors and certainly also the broad readership of the Journal express their sincere gratitude to all reviewers!
