Due to a technical error, Figure 4 appeared incompletely in the final version of this paper. The correct presentation of the figure is below.

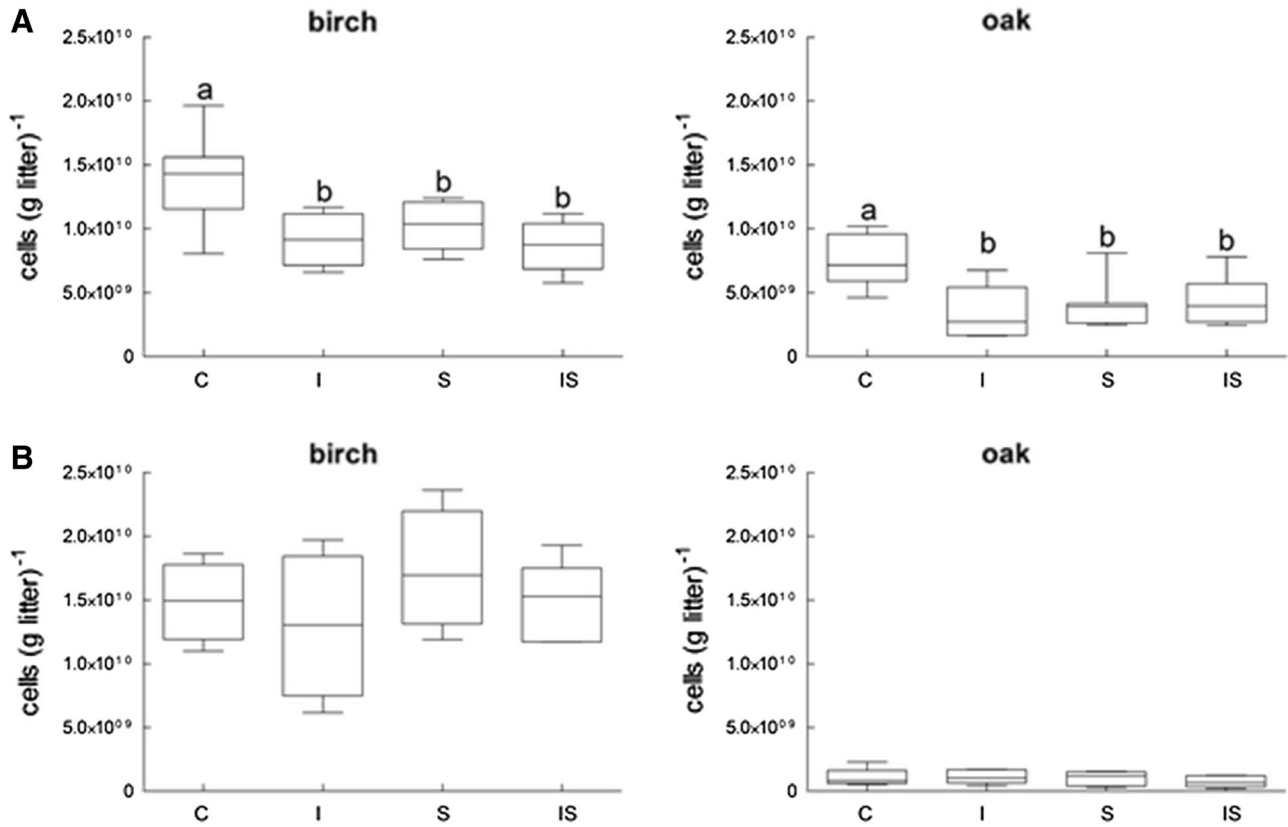

Fig. 4. Bacterial cell densities on birch and oak litter in the aquatic (**A**) and the terrestrial (**B**) environments after 112 days in detritivore-free controls (C) and when isopods (I), snails (S) or isopods and snails (IS) were present. *Whisker-box-plots* indicate minimum, first quartile, median, third quartile, and maximum ($N = 7$); different *lower-case letters* indicate statistically significant differences ($\alpha = 0.05$)
