Erratum to: Int J Clin Oncol DOI 10.1007/s10147-015-0868-6

Unfortunately, the original publication of the article contains an error in Fig. 1 and few errors in reference citations. The errors are corrected with this publication.

Few rows in Fig. 1 are not aligned properly. The corrected version of Fig. 1 is displayed here.

In the page 2, the citation of Ref. [6] in line 9 of left column should be [7], and the subsequent reference numbers should be increased by 1.

In page 8, the sentence “Similarly, some studies have reported differences in the administration of adjuvant chemotherapy between men and women [26–29].” should be written as “Similarly, some studies have reported differences in the administration of adjuvant chemotherapy between men and women [27–29].” That is the four references [26–29] should be changed to three references [27–29]. However, there is no change in the reference list.
