The paper by Dr. Colin A. Chapman (with Dr. Jessica M. Rothman) titled “Within-species differences in primate social structure: evolution of plasticity and phylogenetic constraints” was the most frequently cited of the papers published in *Primates* between 2008 and 2009. His work thus contributed greatly to enhancing the reputation of our journal. For his achievement, Dr. Chapman will receive gifts from the Japan Monkey Centre, the Primate Society of Japan, and Springer.
