In the published article entitled “Childhood vaccine hesitancy in two regions with different socioeconomic backgrounds in Turkey”, there are a number of errors in the Ethical considerations section. The Ethical considerations section in the study should look like this:

The study was approved by an ethics committee (E-18457941–050.99–31187). Permission was obtained from the FHCs (No: 93079172–703.01 & Topic: Permission for Research). All patients were informed about the research purpose and procedure. Informed consent was obtained from those who agreed to participate in the study. The research was conducted according to the ethical principles outlined by the Declaration of Helsinki.

The original article has been corrected.
