Erratum to: Brain Topogr DOI 10.1007/s10548-013-0337-3

The purpose of this erratum is to supplement the following statement in the original review article:

“To the best of the author’s knowledge, there is presently no evidence for responses to stimulus omissions in A1 [primary auditory cortex] of animal models, including awake monkeys.”

with the following:

However, event-related potentials elicited by stimulus omissions have been recorded from the scalp of rhesus

monkeys (Honing et al. 2012). The intracranial sources of these omission responses and the brain networks involved in their generation have yet to be determined.

The reference to Honing et al. (2012) was missing in the original publication of the article.
