Unfortunately in the original publication of the article, some of the panels of immunofluorescence data in Fig. 6d have been erroneously published. The correct figure (Fig. 6d) and legend is given below.

Fig. 6 Effect of doxorubicin on intracellular Ca^{2+} release, calcineurin activation, NF-AT DNA binding, NF-AT-dependent luciferase activity, and FasL expression. MCF-7 cells treated with doxorubicin for 12 h were incubated with anti-NF-AT antibody conjugated with Alexa Fluor and DAPI and detected in Fluorescence microscope (**d**)

The online version of the original article can be found under doi:10.1007/s10549-009-0493-z.
