Correction to:

Cognitive Therapy and Research (2017) 41:645–653

<https://doi.org/10.1007/s10608-016-9829-2>

The original version of this article contained a mistake in the Table 3. In Table 3: Two rows were accidentally cut out

which reported the B coefficients and standard errors for two variables in the multiple regression model, the hyperarousal symptom cluster, avoidance/numbing symptom cluster. The corrected Table 3 is presented below.

The original article can be found online at <https://doi.org/10.1007/s10608-016-9829-2>.

Table 3 Results from the regression analyses examining the three PTSD symptom clusters at baseline as predictors of suicidal ideation at follow-up

Step	Variable entered	B	SE	Total R ² (f ²)	ΔR ² (f ²)
1	Baseline suicidal ideation	0.504***	0.023	0.75*** (0.30)	
	Severity of depressive symptoms	0.021**	0.010		
	Defeat/entrapment	0.044**	0.012		
2	Baseline suicidal ideation	0.422***	0.109	0.82**(0.46)	0.07**(0.08)
	Severity of depressive symptoms	0.022*	0.011		
	Defeat/entrapment	0.028**	0.011		
	Re-experiencing symptom cluster	0.008	0.020		
	Avoidance/Numbing symptom cluster	-0.010	0.018		
	Hyperarousal symptom cluster	0.100**	0.018
