Retraction Note to: *Environ Dev Sustain* (2011) 13:309–330 DOI 10.1007/s10668-010-9263-7

This article has been retracted by the Editor-in-Chief due to severe and unexplained overlap in text and figures with “Strategies for optimal penetration of intermittent renewables in complex energy systems based on techno-operational objectives,” (Received 29 April 2010, Accepted 28 July 2010, Available online 21 August 2010), an article authored by Franco and Salza in Elsevier’s journal *Renewable Energy*. The articles were submitted to and under review by both *Environment, Development, and Sustainability* and *Renewable Energy* during overlapping periods, which violates the ethics policies of both journals. The article in *Renewable Energy* will remain in publication as the version of record.

The online version of the original article can be found under doi:[10.1007/s10668-010-9263-7](https://doi.org/10.1007/s10668-010-9263-7).
