Dear Colleagues:

This double issue completes the first Volume of 2015. It is composed of Special Issue papers (6), two survey papers, three short papers and two UAV section full papers. As previously mentioned, issues are now 'richer' and more diverse than before.

However, I would like to take this opportunity and focus on the new requirements for JINT Special Issues papers: The proposed theme must be very well thought and justified with obvious benefits to the JINT readership; the time table must be realistic; Guest Editors must have an idea of potential authors of papers. Each Special Issue proposal will be reviewed by Editorial Board members before a final decision is made. In this way, every proposal will receive the same attention

and it will go through the same evaluation process. Each Special Issue submitted paper will require three full reviews. Guest Editors will make their recommendation to the Editor-in-Chief for the final list of accepted papers. It is of at most importance to make sure that Special Issue papers are also archive new submissions. We are committed to excellence.

Enjoy the issue.

Kimon P. Valavanis
