

Nina Nikolaevna Uraltseva

Professor N. N. Uraltseva is a world-recognized specialist in the theory of partial differential equations and mathematical analysis. Her fundamental results in the area of linear and quasilinear partial differential equations of elliptic and parabolic type, variational inequalities, free boundary problems, regularity of solutions and free boundaries in important problems of mathematical physics have strong influence on development of these directions in mathematics. Since the 1970's, N. N. Uraltseva is the Main Editor of the series "Problemy Matematicheskogo Analiza." This issue is dedicated to Nina Nikolaevna Uraltseva on the occasion of her jubilee (24.05.2014).
