Correction to: Science & Education

<https://doi.org/10.1007/s11191-020-00104-y>

The author deeply regrets, and apologizes to those affected, as well as to the editors and readers of this journal, that the published version of this article contains the following errors:

1. In Section 4.2 and in the Discussion, two sentences require correction:

Anu Singh-Cundy and Gary Shin go back historically to the 1910s when the American psychologist Henry H. Goddard published his case against “feeble-mindedness,” which did much to motivate the eugenics movement, which, as the textbook explains, “flourished in the first five decades of the twentieth century and resulted in the forced sterilization of 60,000 Americans, around 20,000 in California alone” (Sing-Cundy and Shin 2015, p. 739).

Discover Biology refers, at one point, to the state sterilizations that took place as a result of a eugenics movement in which more than a few scientists were involved (Sing-Cundy and Shin 2015, p. 739).

2. The proper bibliographic reference to McGraw-Hill’s *Biology* in Table 1 is:

2014 *Biology*. Peter H. Raven, George B. Johnson, Kenneth A. Mason, Jonathan B. Losos, and Susan R. Singer. 10th ed. New York: McGraw-Hill.

Subsequent references to this textbook should be Raven, Johnson, Mason, Losos, and Singer 2014) and (Raven et al. 2014).

The online version of the original article can be found at <https://doi.org/10.1007/s11191-020-00104-y>

¹ Stanford University, Stanford, USA

In Table 1, the first author of *Discover Biology* is Anu Sing-Cundy, and a similar error with her name in Section 2.3 should be corrected to (Singh-Cundy and Shin, 2015).

References to the Textbooks Listed in Table 1 Were Intended to Have a Bolded Year, as in (Raven Et al. **2014**) to Indicate a Textbook Found in Table 1 and Not in the References. This Rule Was Unevenly Applied throughout the Text
