The Editor in Chief has retracted this article. Concerns have been raised about the editorial process that led to the acceptance to a Special Issue in the Journal. Post-publication peer-review found that Figs 2, 3 and 4 appear to be adopted from the pictures of commercial products, and the overall research was not found to be academically grounded.

None of the authors have responded to any correspondence from the editor about this retraction.

Supplementary Information The online version supplementary material available at <https://doi.org/10.1007/s11370-020-00321-y>.
