

Reversible Catastrophic Fat Embolism: A Case Report

Kethy Jules-Elysee · Thomas P. Sculco

Published online: 13 September 2006
© Hospital for Special Surgery 2006

The sentence in the beginning of the Discussion section was published incorrectly. It should have read: This case is very interesting because the patient had an uneventful and full recovery postoperatively in spite of evidence of a near-fatal fat embolism syndrome (FES) occurring intraoperatively.

Article appears in *HSS Journal*, Vol. 2, No. 1, pp. 59–61. <http://dx.doi.org/10.1007/s11420-005-0141-z>.
