Correction to: Bull Math Biol https://doi.org/10.1007/s11538-020-00815-x

The original version of this article unfortunately contained a mistake. The presentation of Figure 3 was incorrect. The correct version of Fig. 3 is given below.

The original article can be found online at https://doi.org/10.1007/s11538-020-00815-x.

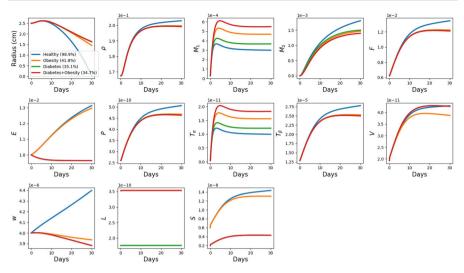

Fig. 3 Wound size and average densities/concentrations. The wound radius, and model variables are plotted for 30 days in a healthy case $(D_1 = D_2 = D_3 = D_4 = 0)$ and in cases of obesity only $(D_1 = D_3 = 0)$, diabetes only $(D_2 = 0)$ and diabetes+obesity. **a D** = (0.2, 1, 2, 1.5) and diabetes
<obesity since RWC(30; 0.2, 0, 2, 1.5) = 35.1\% while RWC(30; 0, 1, 0, 1.5) = 41.8%; **b D** = (0.02, 25, 0.2, 1.5) and obesity <diabetes since RWC(30; 0, 25, 0, 1.5) = 38.6\% while RWC(30; 0.02, 0, 0.2, 1.5) = 40.3%
