THE sentence on lines 110–115 (Another metric has been developed recently by Voller and Vušanović that calculates the volume of the solid ingot which has a macroseggregation level ($M_i = C_i C_o$) greater than or

equal to M_i , termed the Cumulative Distribution Function (CDF) of this article should have a reference number added [23] at the end. Also, the new reference should be added at the end of the references:
