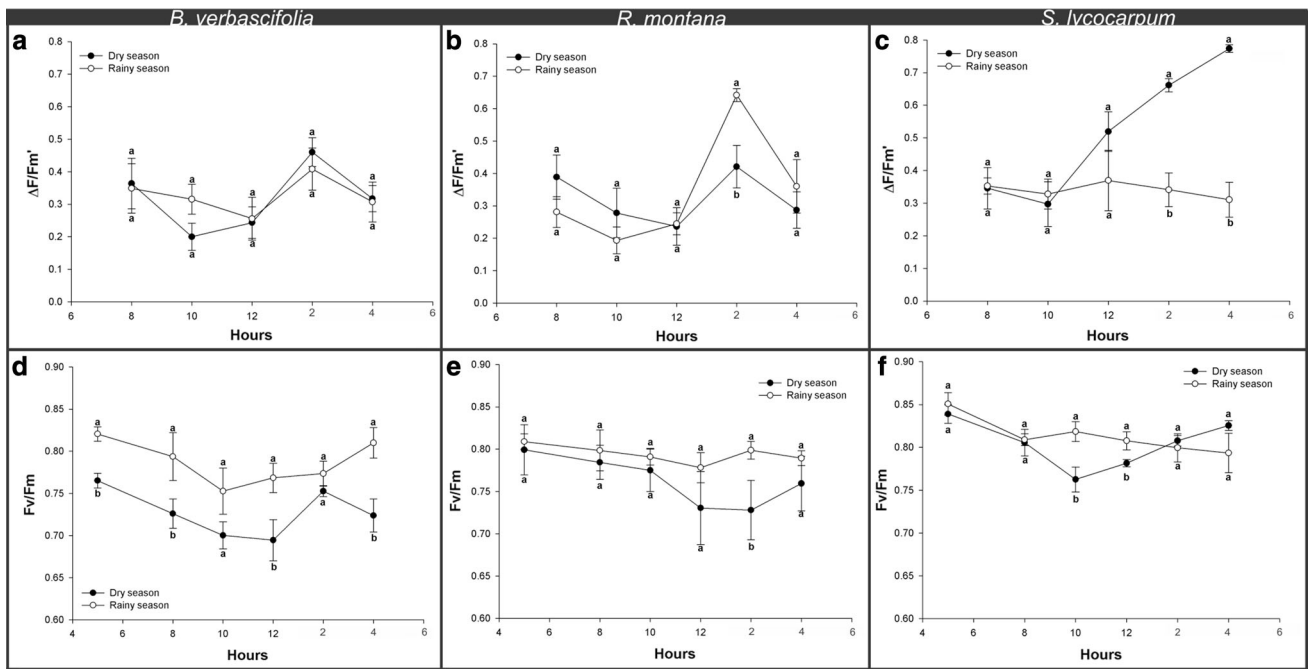

Fig. 7 Averages of the effective ($\Delta F/F_m'$) (a–c) and potential quantum yield (F_v/F_m) (d–f) \pm standard error of *B. verbascifolia* (a, d), *R. montana* (b, e), and *S. lycocarpum* (c, f) during the rainy and

dry seasons of the Neotropical savannah. Means followed by the same letter do not differ statistically
