The autoregulatory loop: A common mechanism of regulation of key sex determining genes in insects

SURESH KUMAR SAWANTH, GAJULA GOPINATH, NAGRAJ SAMBRANI and KALLARE P ARUNKUMAR

The following corrections are to be made in the printed version of the above article:

1. Page 287, section 3.1, line 48 from top: add Hediger *et al.* 2010:

“In females, forced splicing of tra is maintained throughout the life cycle by virtue of the autoregulatory loop (Jablonka and Lamb 1995; Gabrieli *et al.* 2010; Pane *et al.* 2002; Morrow *et al.* 2014)” should be read as “In females, forced splicing of tra is maintained throughout the life cycle by virtue of the autoregulatory loop (Jablonka and Lamb 1995; Gabrieli *et al.* 2010; Hediger *et al.* 2010; Pane *et al.* 2002; Morrow *et al.* 2014)”.

2. Page 289, section 4, line 3 from top: ‘suggests’ to be read as ‘demonstrates’:

“The presence of TRA binding sites on pre-mRNA of Sxl suggests that TRA stimulates the SXL positive autoregulatory feedback loop” should read as “The presence of TRA binding sites on pre-mRNA of Sxl demonstrates that TRA stimulates the SXL positive autoregulatory feedback loop.”

3. Page 289, section 4, line 6 from top: (Horabin 2005) to be read as (Siera and Cline 2008):

“This event is carried over to the other neighbouring germ cells non-autonomously by cell-to-cell interactions (Horabin 2005)” should read as “This event is carried over to the other neighbouring germ cells non-autonomously by cell-to-cell interactions (Siera and Cline 2008).”
