

11th International Conference on Asian and Pacific Coasts (APAC2023), Kyoto, Japan, November 14–17, 2023

Introduction

The International Conference on Asian and Pacific Coasts (APAC) is an international conference to promote academic and technical exchange on coastal related studies that include coastal and ocean engineering and marine environmental problems, among the Asian and Pacific countries/regions. APAC is jointly supported by the Chinese Ocean Engineering Society (COES), the Coastal Engineering Committee of the Japan Society of Civil Engineers (JSCE), and the Korean Society of Coastal and Ocean Engineers (KSCOE). A wide range of organizations from Asian and Pacific countries/regions are its active participants or sponsors. The Conference is held once every two years.

The 11th International Conference on Asian and Pacific Coasts, to be held in Kyoto, Japan was postponed to 2023 due to COVID pandemic, and it will extend the series of conference with the first one being held in Dalian, China in 2001 by the name of Asian and Pacific Coastal Engineering (APACE). To reflect a broader scope, the conference was renamed to Asian and Pacific Coasts (APAC) and it was subsequently held every two years in different countries and regions including Japan (2003), Korea (2005), China (2007), Singapore (2009), HongKong SAR (2011), Indonesia (2013), India (2015), the Philippines (2017) and Vietnam (2019). These conferences have acted as a welcome forum to report and discuss the latest advancements in Coastal, Ocean and Port Engineering and as such, have always been highly valued by all participants. Undoubtedly, APAC 2023 will continue to provide an opportunity for making numerous personal and professional exchanges around the globe.

Call for papers and conference themes

The APAC2023 Local Organizing Committee invites abstract submissions from prospective authors on conference themes or related topics for presentation at the 11th International Conference on Asian and Pacific Coasts, 2023. Abstracts are invited in theory, measurement, analysis, modeling and practice, including, but not limited to:

- Ocean wave, tides, storm surge and tsunami
- Sediment transport and coastal morphology
- Coastal and estuarine hydrodynamics
- Coastal structures and protection
- Beach nourishment and coastal protection
- Marine ecology and coastal environments
- Marine and offshore renewable energy
- Climate change and coastal adaptation
- Natural hazards and coastal assessment

Important dates

Call for abstracts	1 November, 2022
Abstract submission deadline	10 January, 2023
Notification of abstract acceptance	10 March, 2023
Full paper submission deadline	10 June, 2023
Notification of full paper acceptance	10 August, 2023
Registration open	10 June, 2023
Early bird registration closes	30 August, 2023
