During the editing of Fig. 1 the last bar labelled “6” does not have the clue below and it should be

1. Blood culture isolates
2. Isolates from cerebrospinal fluid, cardiac valves, gastrointestinal and other sites
3. Isolates from bone and joint samples
4. Isolates from respiratory, ear, throat and ophthalmology samples
5. Isolates from skin and soft tissue (SST) and pus samples
6. Isolates from SST with associated abscesses and/ or foreign body

Fig. 1 Percentage of phenotypic MSSA isolates per sample site
