**Correction to: Journal of Paleolithic Archaeology**  
<https://doi.org/10.1007/s41982-022-00112-0>

The original version of this article unfortunately contained a mistake.

Random numbers appear instead of specific terms. On page 15 the number 7 appears randomly in the first row of the first paragraph and in the first row of the third paragraph replacing the wording "the zagros" (e.g. The MP research in 7 Mountain and adjacent plains... and Most of the known cave and rockshelter sites in 7 are situated in the western central part). This happens again on page 16 in the second paragraph and page 17 paragraph 3, and on page 18 in the first paragraph and again twice in the third paragraph, page 21 end of third paragraph.

On page 19 in the last paragraph the number 5 appears instead of "the Levant" and again on page 20 paragraph 3, page 22 first paragraph, as well as in the concluding remarks.

On page 22 last row of paragraph 3 the number 8 appears instead of the word discussion.
