The two versions of MMM have been defined in reverse order.

Thus, on p. 130, second column, last paragraph, and p. 131, first column, first paragraph, the correct form is:  
“1) free-volume approach and 2) non-overlapping spherical fragments inside a spherical container.”

Similarly, on p. 132, second column, first paragraph, the correct form is: “MMM1 which uses a free-volume parameterization emits nearly two fragments less than MMM2.”
