The caption for Figure 8 should read as follows:

Fig. 8. Minimum value of the address beam amplitude  $A_0$  versus its frequency shift  $\omega_p$ . Parameters are:  $\alpha = 9$ ,  $\theta = -1$ ,  $\sigma = 0.9$ ,  $\gamma = 0.01$ ,  $T_1 = 0.008$ ,  $T_2 = 0.0002$ ,  $\beta = 0.6$ ,  $r_g = 0.8$ ,  $\delta = 0$ ,  $\tau_f = 41$ ,  $\eta = 5$ ,  $J = 1.63$ , and  $\tau_p = 2000$ . Panel (b) is a continuation and magnification of panel (a) to show the details of the resonances with the cavity mode frequencies.

**Fig. 10.**  
New image for Figure 10a.

We apologize that not all were cited in the acknowledgements:

This work was supported by the EU FP6 STREP FunFACS and by EU FP7 ICT FET Open HIDEAS. NR and CM are supported by an EPSRC doctoral training account. The Deutsche Forschungsgemeinschaft provided some instrumentation.
