Correction to: The Invested in Diabetes Study Protocol: a cluster randomized pragmatic trial comparing standardized and patient-driven diabetes shared medical appointments

Bethany M. Kwan^{1*}, L. Miriam Dickinson¹, Russell E. Glasgow^{1,2}, Martha Sajatovic³, Mark Gritz¹, Jodi Summers Holtrop¹, Don E. Nease Jr¹, Natalie Ritchie^{1,4}, Andrea Nederveld¹, Dennis Gurfinkel¹ and Jeanette A. Waxmonsky^{1,2}

Correction to: *Trials*

<https://doi.org/10.1186/s13063-019-3938-7>

After publication of our article [1] the authors have notified us that the title for Figure 1 was incorrectly captioned in addition it was noticed that the Interventions section contained two errors.

- Originally published Figure 1 title:
SPIRIT Figure for Invested in Diabetes project timeline
- Correct Figure 1 title:
Invested in Diabetes study conceptual model.

The error: Patients step out of group for brief [5–10] individual visits with a provider with prescribing privileges, who provides medication management, orders and referrals, and patient-specific medical advice, i.e. curriculum, dose of intervention, frequency of sessions, visits with medical providers, and group size are consistent across study arms, and are thus not variables in the study.

Should instead read: Patients step out of group for brief (5–10 minutes) individual visits with a provider with prescribing privileges, who provides medication management, orders and referrals, and patient-specific

medical advice. Curriculum, dose of intervention, frequency of sessions, visits with medical providers, and group size are consistent across study arms, and are thus not variables in the study.

The original article has been corrected.
