

AUTHOR DISCLOSURE SUMMARY

Japanese Society of Gastroenterological Surgery Article Series Disclosure Index

The *Annals of Surgical Oncology* ensures balance, independence, objectivity, and scientific rigor in all its published articles. Authors are expected to disclose any significant

financial interest or other relationship(s) involving themselves with any proprietary entity producing health care goods or services related to the content of the article (Table 1).

TABLE 1 Disclosure index for Japanese Society of Gastroenterological Surgery article series

Article title	Lead author	Disclosure
Molecular Pathogenesis and Targeted Therapy of Pancreatic Cancer	Shinji Tanaka	Disclosure. The author has no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Overexpression of Lysophosphatidylcholine Acyltransferase 1 and Concomitant Lipid Alterations in Gastric Cancer	Hirotohi Kikuchi	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Age, Preoperative Subcutaneous Fat Area, and Open Laparotomy are Risk Factors for Incisional Hernia Following Colorectal Cancer Surgery	K. Okabayashi	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Preoperative Cardiac Risk Assessment and Surgical Outcomes of Patients with Gastric Cancer	Sohei Matsumoto	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Risk Factors for Anastomotic Leakage After Intersphincteric Resection Without a Protective Defunctioning Stoma for Lower Rectal Cancer	Motoi Koyama	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Tumor-Associated Macrophages Extend Along Lymphatic Flow in the Pre-Metastatic Lymph Nodes of Human Gastric Cancer	Hiroaki Tanaka	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Long-Term Outcomes of Conversion Hepatectomy for Initially Unresectable Colorectal Liver Metastases	Yoshiaki Maeda	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
The Expression of Melanoma-Associated Antigen D2 Both in Surgically Resected and Serum Samples Serves as Clinically-relevant Biomarker of Gastric Cancer Progression	Mitsuro Kanda	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Visualization of Lymph/Blood Flow in Laparoscopic Colorectal Cancer Surgery by ICG Fluorescence Imaging (Lap-IGFI)	Naoto Nishigori	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
Abdominal Infection Suppresses the Number and Activity of Intrahepatic Natural Killer Cells and Promotes Tumor Growth in a Murine Liver Metastasis Model	Hironori Tsujimoto	Disclosure. The authors have no commercial interests related to the subject of the study, and the study did not receive any external financial or material support.
