The Growing Mind: Multidisciplinary Approaches International Congress to Celebrate the Centennial of Jean Piaget's Birth University of Geneva September 14–18, 1996

This conference intends to evaluate and confront the various perspectives opened by Piaget in the study of development and cognition across different disciplines, as these perspectives have evolved by the end of the twentieth century. The originality of the conference lies in the multidisciplinary approach, addressing the following topics: neurosciences; development and behavior; sensorimotoricity; reasoning, concepts and children's theories; models of development (biological, computational, logical, etc.); epistemology and history of sciences; learning and education; social and affective aspects in development; Piaget's oeuvre.

For information, write The Congress Programme Secretariat, Mrs. Anastasia Tryphon, University of Geneva, Archives Jean Piaget, 18, route des Acacias, 1227 Acacias-Geneva, Switzerland (phone: 41 22 705 70 21; fax: 41 23 300 20 46; e-mail: tryphon@uni2a.unige.ch).
