On several occasions, research by Hannula et al.'s group (Hannula et al., 2010; Savolainen et al., 2011) is referred to as a vibrotactile memory study, rather than a tactile memory study. While the authors feel this does not affect their arguments, they wish to correct the error, as it is possible that readers would consider the authors' references to Hannula et al. to be slightly more favourable to their interpretation if they were vibrotactile studies, rather than non-vibrotactile tactile memory studies.
