Chapter 11:

On page 187, Fig. 1: There was a typo in figure caption, the word RFP-GFP-LC3 has been replaced with RFP-GFP-LD.

The correct caption reads as below:

Hepatocytes transfected with the dual RFP-GFP-LD plasmid were treated with insulin free M199 to induce autophagy. Increased red punctae is indicative of enhanced lysosomal activity as observed with the fasted treatment when compared to control fed cells maintained in complete M199.
