Correction to: Explanation as a Process: User-Centric Construction of Multi-level and Multi-modal Explanations

Bettina Finzel, David E. Tafler, Stephan Scheele, and Ute Schmid

Correction to:

Chapter “Explanation as a Process: User-Centric Construction of Multi-level and Multi-modal Explanations” in: S. Edelkamp et al. (Eds.): *KI 2021: Advances in Artificial Intelligence*, LNAI 12873, https://doi.org/10.1007/978-3-030-87626-5_7

The original version of this chapter was inadvertently published with a misspelling in the explanatory dialogue of Fig. 5. It has been updated as follows:

Fig. 5. An explanatory tree for `tracks_down(bobby, dandelion)`, that can be queried by the user to get a *local* explanation why Bobby tracks down dandelion (steps A and B). A dialogue is realized by different *drill-down* questions, either to get more detailed verbal explanations or visual explanations (steps C.a and C.b)). Furthermore, the user can return to the last explanation (step D).

The updated version of this chapter can be found at
