Correction to: Percutaneous Coronary Intervention: Adjunctive Pharmacology

Paul A. Gurbel and Udaya S. Tantry

Correction to: A. Myat et al. (eds.), *The Interventional Cardiology Training Manual*, https://doi.org/10.1007/978-3-319-71635-0_12

The book was published with a errors on page 171. It stated “Furthermore, the benefits associated with cangrelor were consistent across the subgroups of stable angina ($n = 1991$), NSTEMI ($n = 2810$), and STEMI ($n = 6138$) (interaction, $p = 0.98$), and whether the patient received clopidogrel 300 mg LD or 600 mg LD (interaction, $p = 0.61$).”

We have corrected the following in text.

- Stable angina, $n = 6138$
- NSTEMI-ACS, $n = 2810$
- STEMI, $n = 1991$
- p interaction in patients receiving clopidogrel 300 mg LD or 600 mg LD: $p = 0.62$

The updated online version of this chapter can be found at
