Chapter 96

Arthritic Foot

Seth W. O'Donnell and Brad D. Blankenhorn

What joints are fused in a triple fusion?	Subtalar, talo-navicular, calcaneo-cuboid
What is another term for the subtalar joint?	Talo-calcaneal joint
What is the difference between ankle arthrodesis and ankle arthroplasty?	Ankle arthrodesis involves a fusion of the tibio-talar joint; ankle arthroplasty involves replacing the tibio-talar joint with prosthetic implants
Which fractures can lead to increased risk of subtalar arthritis?	Calcaneal fractures
What is the major risk of joint fusion?	Abnormal loading of adjacent joints with degeneration
