×*Dyckcohnia* BROMELIACEAE

N. Schütz and F. Krapp

×***Dyckcohnia*** G. H. Anderson *ex* J. Grant (Selbyana 19: 116, 1998). — **Distr:** Cultivated only.

= *Dyckia* × *Deuterocohnia*. First reported by Anderson (1986: 103). He reported an unnamed hybrid *Deuterocohnia schreiteri* × *Dyckia fosteriana* and described it as variable in colour, and with spines more similar to *Dyckia fosteriana*. Currently, 5 additional cultivars are known:

‘Bones Mahagoni’ (= *Deuterocohnia brevispicata* (female) × *Dyckia reitzii* ‘Rubra’), ‘Cherry Bomb’ (= *Deuterocohnia brevispicata*

(female) × *Dyckia estevesii*), ‘Conrad Morton’ (= *Dyckia macedoi* (female) × *Deuterocohnia meziana*), ‘July’ (= *Deuterocohnia lorentziana* cf. (female) crossed with a *Dyckia marnier-lapostollei*-hybrid), and ‘June’ (= (*Deuterocohnia lorentziana* × *Dyckia* sp.) (female) × *Dyckia* sp.).
