LIBRI NOVI

Atlas der Fluoreszenzangiography des Augenhintergrundes

edited by Prof. Dr. S. SHIKANO and Prof. Dr. K. SHIMIZU, Tokyo.
German translation and adaptation by Dr. P.-D. STEINBACH, Mainz.
Introduction by Prof. Dr. A. NOVER, Mainz.

1969. X and 202 pag. 247 Figs., 60 colour figs. 20.5 × 30 cm.
Price DM 128.—.

This beautifully illustrated volume on fluorescence angiography of the fundus has been published originally in English (1968). The first German edition has now become available.

Due to the excellent translation it is of equal value as the original English version.

This atlas provides ophthalmologists with a wealth of information on all aspects of the subject.

Fluorescence angiograms of the normal and pathologic fundus are discussed, including development anomalies, circulatory disorders of general and local nature, inflammatory and degenerative conditions and neoplasms.

This atlas is a must for all scientists interested in this new and specialised field of ophthalmology.
