Erratum

Naunyn-Schmiedeberg's Arch Pharmacol (1986) 334:430–435

The effect of age on the sensitivity of pre- and postsynaptic alpha-adrenoceptors to agonists and antagonists in the rat

R. P. McAdams¹ and J. F. Waterfall²

¹ Department of Pharmacology, Wyeth Research (UK), Huntercombe Lane South, Taplow, Maidenhead, Berkshire SL6 0PH, UK

² Department of Biology, Roche Products Ltd, Welwyn Garden City, Herts, AL7 3AY, UK

Due to an unfortunate printing error, the last sentence in the fourth paragraph in the Results on p 432 was incorrect. The sentence should have read:

There was little or no change in antagonist pA₂ values obtained for prazosin or indoramin over the range 5–50 weeks.

Instead of:

There was little or no antagonist pA₂ values obtained for prazosin or indoramin over the range 5–50 weeks.
