Erratum

Reflex peristalsis in the guinea pig isolated ileum is endogenously controlled by kappa opioid receptors

Naunyn-Schmiedeberg's Arch Pharmacol (1990) 341:450–454

W. Kromer

Two unfortunate typesetting errors occurred:

Page 450, right column, second paragraph, line 16 should read: “nor-binaltorphimine” instead of “binaltorphimine”.

According to the above references, the K_e values of nor-binaltorphimine at κ receptors, naloxone and CTOP-NH₂ at μ receptors and ICI 174,864 at δ receptors differ (i.e., being ca. 0.41, 1.5, 1.4 and 22 nmol/l, respectively).

Page 453, left column, second paragraph, line 7 should read 13 instead of 1:

According to their apparent dissociation constants at the μ receptor (i.e., 13 and 1.5 nmol/l for nor-binaltorphimine and naloxone, respectively; same ref.), naloxone should had been more potent than nor-binaltorphimine in case the μ receptor instead of the κ receptor was predominantly functional.
